EARLHAM HEALTH SERVICES

Welcome ESR Students!

Enclosed is the Earlham College Health and Immunization record. Please complete this form and return it to Earlham Health Services, Earlham College, Drawer #197, Richmond, IN 47374-4095. We ask that you pay special attention to the immunization section on the form and obtain vaccinations or boosters for any diseases that are not up to date according to the requirements listed for the Measles, Mumps, Rubella and Tetanus vaccines.

We take care to make sure that the campus is as safe and healthy as possible, which is particularly important on Earlham College’s undergraduate campus where there are a large number of international travelers and students living in dorms where illness can spread easily. Completing the health form will assist us in this process. We will also keep this form on file and use it should you ever come to Earlham Health Services for an appointment. If you are an Access student, it may seem odd for us to ask you to complete a form relating to residential study, however in our experience health issues and illnesses do arise during the two-week intensives. Given the number of times an Access student does come to campus, we want to have this information on file.

Please look at our website for important facts about Earlham Health Services. The Health Services charges $25 to see the nurse, and $30 for an appointment with the Doctor. Supplies, medications, laboratory tests and immunizations will be charged to your account, unless payment at the time of service is preferred by you. You must initiate any insurance claim; an insurance-ready form will be sent to you for any insurance covered charges.

Please call me at (765) 983-1346 if you have any questions about our services or the immunization requirements. I will be looking for your completed Health Record.

In filling out the enclosed Health Record form, please keep the following in mind:

- If born before Jan. 1, 1957, no need to update childhood vaccinations.
- If born after Jan. 1, 1957:
  - Documentation of two MMR (Measles, Mumps, Rubella), If you don’t have documentation, a titer test can be done.
- Need tetanus shot within the last 10 years.

Sincerely,

Mary Ann Stienbarger, R.N.
Director of Earlham Health Service
